DETAILED ACTION

Claim Objections

1. Applicant's amendment has overcome the claim objections.

Claim Rejections - 35 USC § 112

2. Applicant's amendment has overcome the rejection under 35 USC112...

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 1-6 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Durr, 6,363,618, as set forth in the previous Office action.

Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was

Page 3

not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Durr. 6,363,618 in view of Wieland, 5,243,764, as set forth in the previous Office action.

Response to Arguments

8. Applicant's arguments filed 09 March 2007 have been fully considered but they are not persuasive. Applicant argues that the component of Durr has nothing to do with a connection between a working tool carrier and a protruding part of the crankcase. It is noted that applicant has not claimed that the component forms any part of the protruding part of the crankcase, only that the component is embedded in the crankcase. Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See In re Van Geuns, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). Here, applicant has claimed "characterized in that the working tool carrier is clamped to a protruding part (20) of the crankcase (12) provided with a component (16)". Applicant has claimed that the carrier is clamped to a protruding part of the crankcase, and that the crankcase is provided with a component. It is the examiner's position that Durr discloses the carrier clamped to the protruding part of the crankcase. Applicant also argues that the component of Durr does not extend between the crankcase and the section where the carrier is clamped. As the component of Durr is in the lower second of the crankcase, and not the upper section, it must extend between the crankcase and the carrier.

Art Unit: 3723

9. Applicant's argument that there is no motivation to combine Durr and Wieland because they relate to different connections is not clearly understood. Applicant has not claimed that the component is any part of the connection of the carrier to the crankcase. Wieland does teach the use of bolts to connect various parts of the tool assembly. more bolts secured in related nuts. It would have been obvious to one of ordinary skill in the art to have provided Durr with the connection between the carrier and the casing as taught by Wieland, column 1, lines 30-63, to allow the carrier to be removed, to change the chain, or to replace the carrier if damaged.

Conclusion

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Maurina Rachuba whose telephone number is 571-272-4493. The examiner can normally be reached on Monday-Friday.

Art Unit: 3723

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Hail can be reached on 571 272 4485. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
